- Stock and quantity TBD

Why HeartSine?

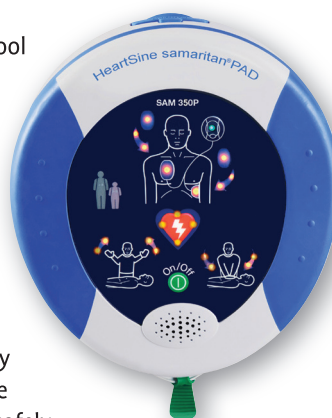

- ▶ **Easy to use by all rescuers**, regardless of skill level, due to simple two-button operation, intuitive voice/visual prompts and no lid to open or complex displays or controls
- ▶ **One-change maintenance**, due to one expiration date on the pads and batteries, means less inventory to manage and order
- ▶ **Smallest and lightest AED** on the market, making it easy to transport for use on the sidelines as well as in the school halls
- ▶ **Most rugged AED**, offering the highest level of protection from moisture and dust (IP56) which is ideal for heavily trafficked environments
- ▶ **Suitable for both adults and children** from one year old
- ▶ **Industry leading 10-year warranty** for maximum reliability
- ▶ **Complete AED solutions** available to manage all aspects of your AED deployment—from installation to maintenance—through a single point of contact

Be Prepared for Cardiac Emergencies Protect Young Lives

Sudden cardiac arrest (SCA) is the leading cause of death on school property, affecting thousands of children each year. When early CPR and an Automated External Defibrillator (AED) are available, the chance of survival from sudden cardiac arrest can increase from 5% to 75%. If SCA happens at your school, preschool or university, are you and your staff prepared?

For the best outcomes for SCA recovery, a growing number of teachers, nurses and school administrators are turning to the HeartSine® samaritan® PAD (Public Access Defibrillator) to protect their students, visitors and staff. Not only is this AED very simple to use — by both trained and untrained rescuers — it's the smallest and lightest AED on the market so it can be easily and safely transported throughout your school and to your fields for sporting events.
