

HeartSine samaritan® PAD

Public Access Defibrillator

Be Ready to Treat Cardiac Emergencies With Clinically Advanced Technology

The risk of sudden cardiac arrest (SCA) is high in any medical facility, whether it be a private practice, a nursing home or in the common areas of a medical center. Without immediate access to an Automated External Defibrillator (AED) you risk the safety of your patients, visitors and staff.

Because you understand the clinical aspects of defibrillation, you know that not all AEDs are created equal. Leveraging its patented SCOPE™ biphasic technology, the HeartSine® samaritan® PAD can more accurately adjust for patient impedance to quickly and successfully deliver the first shock — critical factors that can significantly increase the chance of survival for your patient, visitor or employee who suffers an SCA.

With a long history of innovation in public access defibrillators, HeartSine has successfully combined its clinically superior technology with an innovative design that will meet your demanding expectations — all in an affordable package that offers the lowest cost of ownership of any AED.

Why HeartSine?

- ▶ **Proprietary SCOPE technology** adjusts to the widest range of impedances
- ▶ **Fast time to shock**, which is key as every second counts
- ▶ **Easy to use by all rescuers**, regardless of skill level, due to simple two-button operation, intuitive voice/visual prompts and no lid to open or complex displays or controls
- ▶ **Industry leading 10-year warranty** for maximum reliability and lowest total cost of ownership
- ▶ **Smallest, lightest and most rugged AED** on the market, offering the highest level of protection from moisture and dust (IP56) which is ideal for heavily trafficked environments
- ▶ **One-change maintenance**, due to one expiration date on the pads and batteries, means less inventory to manage and order
- ▶ **Complete AED solutions** available to manage all aspects of your AED deployment—from installation to maintenance—through a single point of contact
