

HeartSine samaritan® PAD

Public Access Defibrillator

Be Prepared for Cardiac Emergencies Protect the Public and First Responders

As a first responder, you're usually the first on scene when someone suffers a sudden cardiac arrest. And that someone may very well be one of your own. Because your first priority is to ensure the safety of the public, an Automated External Defibrillator (AED) is a must have for the safety of the public as well as those who protect us.

You have a choice of AEDs and not all AEDs are created equal. The HeartSine® samaritan® PAD surpasses all others as the smallest, lightest, and most rugged AED with the lowest cost of ownership of any AED on the market. With a history of innovation in public access defibrillators, HeartSine has successfully combined its clinically-advanced technology with an innovative design that fits as easily in a space-constrained police car, as it does on the wall of a busy fire station. And it's all available in a simple-to-use package that carries the highest level of protection from dust and moisture and an industry-leading 10 year warranty.

Why HeartSine?

- ▶ **Smallest and lightest AED** on the market, making it easy to transport in space-constrained vehicles
- ▶ **Most rugged AED**, offering the highest level of protection from moisture and dust (IP56) which is ideal for use on the road
- ▶ **Ease of use for all rescuers**, regardless of skill level, due to simple two-button operation, intuitive voice/visual prompts and no lid to open or complex displays or controls
- ▶ **Lowest total cost of ownership** due to lower acquisition and maintenance costs for consumables
- ▶ **One-change maintenance** for time-sensitive items due to one expiration date on the pads and batteries, means less inventory to manage and order
- ▶ **Suitable for both adults and children** from one year old
- ▶ **Industry leading 10-year warranty** means lowest total cost of ownership for maximum ROI
