

Readiness matters.

**LIFELINKcentral™ AED program manager and
HeartSine® Connected AEDs**

Take charge with a complete, connected solution for AED program management.

AEDs **work.**

But only if they're ready.

Sudden cardiac arrest (SCA) can happen to anyone, anywhere. That's why public access defibrillators are important. They put lifesaving technology where it can do the most good. Ongoing system maintenance, however, has been time-consuming and at risk for human errors.

Readiness made easy.

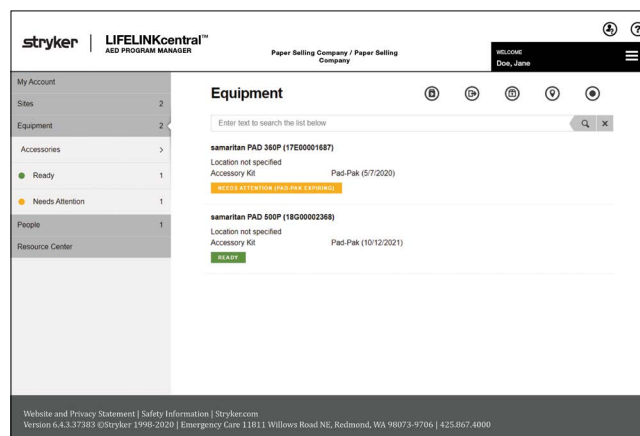

By providing remote monitoring, LIFELINKcentral AED program manager makes managing your AEDs easier and more accurate. LIFELINKcentral program manager facilitates remote management with a Wi-Fi connection to each HeartSine Connected AED. Readiness information, automatically collected by the software, and Pad-Pak expirations are tracked for easy management — whether you have one AED or 100, in a single office or across thousands of kilometers. LIFELINKcentral AED program manager even sends you alerts of conditions affecting readiness.

For each HeartSine Connected AED, you can:

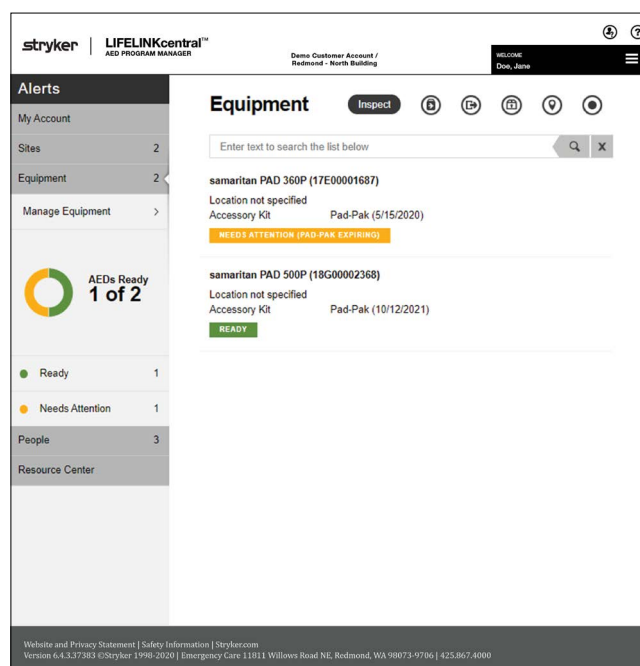

- Remotely monitor readiness information
- Receive alerts of conditions affecting readiness
- View the status of all connected AEDs
- Get notifications if a Pad-Pak is expiring or has expired
- View manually-entered location on a map

Complete management system.*

You can manage all your AEDs with LIFELINKcentral AED program manager, even those that aren't connected.* Once the device information is entered manually for you, you can update inspection data on a regular schedule. With LIFELINKcentral, you will have a complete snapshot of AED and rescuer readiness. You can even pinpoint them on a map and create alerts for scheduled battery or electrode replacement.

Basic license

PRO license

*Features available only with LIFELINKcentral PRO license.

Choose the license that fits your needs

LIFELINKcentral AED program manager Basic license is included with each Stryker connected AED, but there are numerous reasons to invest in the PRO license.

1. LIFELINKcentral PRO license offers the services listed, and is charged as an annual fee per account.
2. The battery and QUIK-STEP electrodes delivered in the LIFEPAK CR2 AED box will be managed with Basic license. PRO license is required to manage spare batteries and/or additional QUIK-STEP electrode trays.
3. Upload fee applies.

If you purchased your HeartSine Connected AED from an authorised Stryker distributor or reseller, this distributor or reseller will have access to your LIFELINKcentral AED program manager account and may receive notifications prompted by the HeartSine Connected AED. Please note that this setting to notify your distributor or reseller can be disabled at ANY time; if you wish to disable this setting, please send a request to Stryker Customer Support to self-manage your site without notifications to your distributor or reseller.

All claims valid as of September 2021.

For further information, please contact your Stryker representative or visit our website at strykeremergencycare.com

Emergency Care Public Access

AED users should be trained in CPR and in the use of the AED.

Although not everyone can be saved, studies show that early defibrillation can dramatically improve survival rates. AEDs are indicated for use on adults and children. AEDs may be used on children weighing less than 25 kg (55 lb) but some models require separate defibrillation electrodes.
