

# Forward Hearts

## for HeartSine® AEDs

**Forward Hearts lets survivors of a sudden cardiac arrest event pay it forward and potentially save another life by donating an AED to the organization of the survivor's choice.**

### **How it works**

When a HeartSine samaritan® PAD is used to save a life, the sudden cardiac arrest survivor chooses an organization to receive a donated AED provided by Stryker on behalf of the survivor. The survivor can choose to make their donation to the organization anonymously or be part of a public announcement.

If you have a Forward Hearts story, or know of someone who survived a sudden cardiac arrest due to the use of a HeartSine samaritan PAD, please share your story with us. Learn more about the program at [heart sine.com](http://heart sine.com).

Stryker is committed to saving lives and making public access Automated External Defibrillators (AEDs) more readily available in the workplace and community. The donation of a defibrillator through the Forward Hearts program extends this lifesaving technology to even more people, offering many a better chance of survival in the case of sudden cardiac arrest.

Please refer to [heart sine.com](http://heart sine.com) for the list of requirements to qualify for Forward Hearts after you have survived a sudden cardiac arrest.
